

## **Head Lice Information**

1. **Head Lice:** Harmony wants to help keep your child and our classrooms free of head lice. Head lice are a common frustration, however, the mass screening of all students in a classroom and/or school does not control the spread of head lice. Rather, the spread of head lice can be minimized with routine inspection for live head lice and nits by parents and treatment of those students found with live head lice. Head lice can spread from person to person by having head-to-head contact. Having head lice is not associated with age, sex, race, social class or hygiene. If your child complains of having an itchy head, please check it thoroughly. Enclosed is helpful information on head lice.
